

CONTRIBUTORS

Rebecca Blank is an associate professor of economics at Northwestern University and a member of the research faculty at NU's Center for Urban Affairs and Policy Research. She is also a research associate of the National Bureau of Economic Research. Her research focuses on the interaction between macroeconomic effects, labor market and social welfare programs, and the behavior and well-being of low-income families. Recent research includes a study of the dynamic patterns of participation in AFDC and Food Stamp programs, several studies of the relationship between economic growth and income distribution over the 1980s, and comparative work on social protection programs between the U.S. and other industrialized countries.

David Card is professor of economics at Princeton University. He is currently the co-editor of *Econometrica*, and a research associate of the National Bureau of Economic Research. His current research interests include: evaluating the benefits of school spending, analyzing the contributions of civil rights legislation and other factors in black-white wage differentials, and the labor market effects of minimum wages.

Richard B. Freeman holds the Herbert Ascherman Chair in Economics at Harvard University. He is also director of the Labor Studies Program at the National Bureau of Economic Research, and executive programme director of the Comparative Labour Market Institutions Programme at the London School of Economics' Centre for Economic Performance. He is currently a member of the Secretary of Labor and Commerce's Commission on The Future of Worker Management Relations. His research interests include youth labor market problems, trade unionism, high-skilled labor markets, crime, economic discrimination, philanthropic behavior, income distribution and equity in the marketplace, and labor in developing countries.

Lawrence F. Katz is Chief Economist of the U.S. Department of Labor. He is currently on leave from his positions as a professor of economics at Harvard University and a research associate of the National Bureau of Economic Research. His research interests include family income inequality, labor mobility and unemployment, changes in the structure of wages, theories of wage determination, the problems of disadvantaged youth, and regional economic growth. He is currently an editor of the *Quarterly Journal of Economics*.

Lisa M. Lynch is an associate professor of economics and international business and co-director of the Clayton Center for International Economic Affairs at the Fletcher School of Law and Diplomacy, Tufts University. She is an editor of the *Journal of Labor Economics*, associate editor for *Labour Economics: An International Journal*, and a research associate of the National Bureau of Economic Research. Her current research examines the impact of private sector training on workers' wages and firms' productivity, and the school to work transition of youths. She is the author of numerous papers in research volumes and journals and has lectured extensively in the United States, Canada, Europe, and Japan.

Joel Rogers is professor of law, political science, and sociology at the University of Wisconsin-Madison, where he also directs the Center on Wisconsin Strategy (COWS), a research and policy institute active in current debates on industrial upgrading. He is a consultant to the Labor and Human Resources Committee of the U.S. Senate. His research interests include normative democratic theory, political parties, labor organizations and other secondary associations, wage regulation, welfare administration, occupational and vocational training, and the linkage of human capital and technology policies in industrial upgrading.

Wolfgang Streeck is professor of sociology and industrial relations at the University of Wisconsin-Madison. He is presently a Fellow at the Wissenschaftskolleg zu Berlin. His research interests include comparative industrial relations in Western Europe, interest groups, and problems of European integration. He is presently finishing a book on the "social dimension" of the European common market, and is working on a study (with Ronald Dore) on the differences between Japanese, German, British, and American capitalism.
