#### Books

Beyond Dreamers: School, Work and Identify among Diverse Undocumented New Yorkers (with Sofya Aptekar), book under contract with Russell Sage Foundation

• Mixed methods study of undocumented young adults in NYC that investigates how national, race/ethnicity and social class stratify the experience of illegality. A growing share of the undocumented population originates from Asia, the Caribbean and Africa and entered the country legally with a visa. This project seeks to address critical gaps in our understanding of legal status by exploring how contemporary immigration policies, rooted in colonial and neocolonial relations of power and extraction, intersect with race/ethnicity to shape educational trajectories, labor outcomes, ethnic enclaves, family life and future migration plans among racially and socioeconomically diverse populations of undocumented migrants in NYC.
