TABLE 1.3 / Decomposition of Changes in National Poverty Rates

	National Poverty Rate	Population Shares	Group-Specific Poverty Rates
1970 to 2004	-0.94	1.15	-2.09
1980 to 2004	0.56	0.63	-0.07
1990 to 2004	-0.01	0.54	-0.56
2000 to 2004	0.90	-0.28	1.18
1970 to 2009	1.43	2.27	-0.84
1980 to 2009	2.94	1.70	1.24
1990 to 2009	2.36	1.61	0.75
2000 to 2009	3.28	0.84	2.44

*Source:* Authors' tabulations of microdata from the 1970, 1980, 1990, and 2010 One Percent Public Use Microdata Sample of the U.S. Census of Population and Housing and the 2000 and 2005 American Community Survey.

*Notes:* The decompositions above are calculated as follows. Let  $w_{it}$  be the proportion of the U.S. population at time  $t$  accounted for by group  $i$ , where the index  $i$  encompasses the native born and each of the country-of-origin groups listed in Tables 1.1 and 1.2. In addition, define  $poverty_{it}$  as the corresponding poverty rate for group  $i$  in year  $t$ . The national poverty rate for 1970 and 2004 can be expressed as a weighted sum of the group-specific poverty rates:

$$poverty_{1970} = \sum_{i=1}^I w_{i1970} poverty_{i1970}, \quad poverty_{2004} = \sum_{i=1}^I w_{i2004} poverty_{i2004}.$$

The change in poverty rates can be expressed by

$$\Delta Poverty = \sum_{i=1}^I w_{i2004} poverty_{i2004} - \sum_{i=1}^I w_{i1970} poverty_{i1970}.$$

Adding and subtracting the term  $\sum_{i=1}^I w_{i1970} poverty_{i2004}$  to equation (2) and factoring give the decomposition

$$\Delta Poverty = \sum_{i=1}^I (w_{i2004} - w_{i1970}) poverty_{i2004} + \sum_{i=1}^I w_{i1970} (poverty_{i2004} - poverty_{i1970}).$$

The first component on the right-hand side shows the contribution to the poverty change associated with the shift in population shares between 1970 and 2004. This component is reported in the second column of the table. The second component represents the contribution of changes in group-specific poverty rates between 1970 and 2004 holding the population shares constant at 1970 levels. This component is reported in the third column of the table.

TABLE 1.4 / Immigrant Poverty Rates by Census and Arrival Years

Year of first arrival	Census Year				
	1970	1980	1990	2000	2009
A: All immigrants					
1965–1970	0.180	0.123	0.108	0.103	0.103

FIGURE 2.1 / Correlation Between Immigration and Poverty Rates

Source: Author's compilation based on the U.S. Census 1990 and 2000 and the 2009 American Community Survey.

FIGURE 2.2 / Effect of Immigrants on Native Wages

*Source:* Author's compilation based on the U.S. Census 2000, the 2009 American Community Survey, and the author's own calculations.

*Note:* The changes as a percentage of the native wage are calculated using the model in the chapter and three parameter combinations, as described in the table 2.1. The schooling groups are individuals with no degree, high school graduates, individuals with some college education, and college graduates. Each schooling group is divided into Young (individuals with less than twenty years of potential labor market experience) and Old (individuals with more than twenty years of potential labor market experience). We assumed that the national market is integrated in the run.

TABLE 2.1 / Parameter Range in Simulations

Parameter Estimates	Most Pessimistic	Preferred Estimates	Most Favorable
$\sigma_{HL}$ , Elasticity between more and less educated	1.5	1.75	2.0
$\sigma_{IN}$ , Elasticity between immigrants and natives	infinity	20	12
$\lambda$ , Strength of college externality	0.0	0.45	0.75

*Source:* Author's compilation based on estimates from the literature.

*Note:* The table summarizes the values of the parameters taken from the previous literature and used in our simulation of wage effects of immigrants and emigrants.

TABLE 2.2 / National Immigration Rates

Schooling Group	Age-Experience	Gender	Net Rates	
			1990–2000	2000–2009
No diploma	young	women	11.4%	–3.0%
	young	men	15.8	–2.4
	old	women	8.6	8.2
	old	men	10.3	11.2
High school graduate	young	women	6.6	–0.3
	young	men	8.0	1.3
	old	women	5.4	3.5
	old	men	7.7	4.8
Total less educated			7.1	2.4
Some college education	young	women	1.3	2.3
	young	men	0.8	2.7
	old	women	2.9	5.6
	old	men	3.3	5.2
College graduate or more	young	women	8.3	5.5
	young	men	6.5	3.8
	old	women	13.5	8.6
	old	men	9.5	7.1
Total more educated			4.3	4.1
Total			5.8	3.4

*Source:* Author's compilation based on the U.S. Census 1990 and 2000 and the 2009 American Community Survey.

*Note:* Net immigration rates for a group are measured as the net inflows of immigrants in the group during the period, relative to the population (natives + immigrants) in the group, at the beginning of the period. Young individuals are those with less than twenty years of potential experience in the labor market. Potential experience is (age-years of schooling–6). The population considered covers noninstitutionalized individuals in working age (sixteen to sixty-five).

TABLE 2.3 / Adult Poverty Rates Among U.S. Born

Schooling Group	Age-Experience	Gender	Poverty Rates			
			2000	2009	Change 1990–2000	Change 2000–2009
No diploma	young	women	34.5	42.4	8.3	7.9
	young	men	20.0	26.1	4.9	6.1
	old	women	26.6	33.5	–6.9	6.9
	old	men	19.2	24.3	–9.5	5.1
High school graduate	young	women	17.0	23.9	–5.5	6.8
	young	men	9.5	13.1	–1.0	3.6
	old	women	8.9	11.7	–2.6	2.8
	old	men	7.2	9.4	–3.1	2.2
Total less educated			16.0	22.0	1.5	6.0
Some college education	young	women	11.0	16.5	–3.3	5.5
	young	men	7.9	11.3	–0.7	3.4
	old	women	5.6	7.9	–2.1	2.4
	old	men	4.4	6.5	–3.3	2.0
College graduate or more	young	women	3.5	4.6	3.7	1.0
	young	men	3.2	4.0	2.9	0.8
	old	women	2.5	3.3	2.8	0.8
	old	men	2.2	3.0	1.3	0.8
Total more educated			4.2	5.4	0.3	1.2
Total U.S. born			12	16	1.1	4

Source: Author's compilation based on the U.S. Census 1990 and 2000 and the 2009 American Community Survey.

Note: All numbers in percentages. Poverty rates are equal to the percentage of people in the group below the Federal Poverty line. The groups are defined as in table 2.1.

TABLE 2.4 / Imputed Effect of Immigrants on Poverty Rates and Actual Rate Changes

Skill Group	1990–2000				2000–2009			
	Imputed, High Estimates	Imputed, Intermediate Estimates	Imputed, Low Estimates	Actual	Imputed, High Estimates	Imputed, Intermediate Estimates	Imputed, Low Estimates	Actual
Overall, U.S. born	0.02	–0.02	–0.04	–0.38	–0.07	–0.10	–0.12	2.10
Male	0.02	–0.02	–0.04	–0.09	–0.08	–0.08	–0.09	2.04
Female	0.02	–0.02	–0.04	–0.65	–0.06	–0.11	–0.13	2.18
Overall black	0.04	–0.01	–0.06	–2.90	–0.13	–0.17	–0.20	1.52
Male	0.04	–0.01	–0.05	–1.39	–0.09	–0.12	–0.14	1.98
Female	0.04	–0.01	–0.07	–4.15	–0.15	–0.20	–0.24	1.23
Overall Hispanic	0.06	0.00	–0.06	–2.35	–0.15	–0.18	–0.21	–0.34
Male	0.05	–0.01	–0.06	–1.57	–0.15	–0.16	–0.18	–0.35
Female	0.07	0.00	–0.07	–3.11	–0.14	–0.20	–0.24	–0.16

Source: Author's compilation.

Note: The calculations are based on the imputed wage effects of immigrants, calculated based on the model in the text. The effect of immigration is calculated as the difference in poverty rates considering wage income with and without net immigration of the considered decade.

TABLE 2.A1 / Federal Poverty Thresholds for Pre-Transfer Family Income, 1999

Number of People	Number of Related Children								
	None	One	Two	Three	Four	Five	Six	Seven	Eight +
One person under 65 years	8,667								
One person, 65 years or older	7,990								
Two people, RP under 65 years	11,156	11,483							
Two people, RP 65 years or older	10,070	11,440							
Three people	13,032	13,410	13,423						
Four people	17,184	17,465	16,895	16,954					
Five people	20,723	21,024	20,380	19,882	19,578				
Six people	23,835	23,930	23,436	22,964	22,261	21,845			
Seven people	27,425	27,596	27,006	26,595	25,828	24,934	23,953		
Eight people	30,673	30,944	30,387	29,899	29,206	28,327	27,412	27,180	
Nine or more people	36,897	37,076	36,583	36,169	35,489	34,554	33,708	33,499	32,208

Source: Author's compilation based on "Poverty Thresholds by Size of Family and Number of Children," U.S. Census Bureau (1999). Available at: <http://www.census.gov/hhes/www/Poverty/data/threshld> (accessed May 23, 2013).

Note: Poverty thresholds (yearly income) by size of family and number of children under 18 years. All numbers in 2000 dollars. To obtain those in 2009 multiply by 0.773. The poverty thresholds are the same for all parts of the country; they are not adjusted for regional, state, or local variations in the cost of living. For a detailed discussion of the poverty definition, see U.S. Census Bureau, Current Population Reports, Series P-60, No. 210, Poverty in the United States, 1999.

TABLE 2.A2 / Immigration Rates in Top Immigration States

State	1990–2009					2000–2009				
	No Degree	High School Graduate	Some College	College Graduate	Total 1990–2000	No Degree	High School Graduate	Some College	College Graduate	Total 2000–2009
Arizona	38.8	16.3	3.5	10.4	14.2	9.7	7.6	5.8	9.3	7.8
California	19.9	16.5	1.5	14.6	11.8	–1.2	3.2	5.3	9.8	4.6
Colorado	36.1	8.6	1.6	7.3	8.8	12.7	3.0	3.6	3.1	4.2

High English immigrants	-0.076	0.066	-0.088	0.064	-0.063	0.065
Low English immigrants	-0.360	0.201	-0.251	0.105	-0.469	0.215
Observations	544		272		272	

*Source:* Author's compilation based on the 2007–2009 American Community Surveys (Ruggles et al. 2010), and the U.S. Bureau of the Census (2003).

*Note:* Sample for constructing hours worked includes all those age sixteen to sixty-five who are old enough to be out of school (given normal progression) and live in 136 large metropolitan areas and not in group quarters. To be in the wage sample requires being in the hours worked sample plus being employed, with positive weeks and hours worked last year, nonzero wage and salary earnings, and zero self-employment and farm earnings; for natives it also requires speaking English only or very well. Hourly wages above \$200 and below \$2 in 1999 dollars are reset to these thresholds. Data have been aggregated to 136 metropolitan areas  $\times$  two education groups  $\times$  two years (2000 and “2008,” combining the three ACSs). Table shows unweighted means and standard deviations (SD).

TABLE 3.5 / Immigrant Relative Wage Response by English Skills

	All	High School or Less	More than High School
All immigrants	-0.040 (0.003)	-0.034 (0.004)	-0.054 (0.006)
By broad English-language skills			
Speaks English only, very well, or well	-0.022 (0.004)	-0.011 (0.004)	-0.045 (0.006)

P-value, equal coefficients	0.000	0.000	0.030
By detailed English-language skills (112 MSAs)			
Speaks English only or very well	-0.020 (0.004)	-0.012 (0.004)	-0.036 (0.007)
Speaks English well	-0.028 (0.005)	-0.018 (0.006)	-0.047 (0.011)
Speaks English not well	-0.049 (0.006)	-0.037 (0.007)	-0.071 (0.013)
Speaks English not at all	-0.083 (0.014)	-0.050 (0.008)	-0.144 (0.035)
P-value, equal coefficients	0.000	0.000	0.005

*Source:* Author's compilation based on the 2007–2009 American Community Surveys (Ruggles et al. 2010), and the U.S. Bureau of the Census (2003).

*Note:* Table shows coefficient estimates from regressions of the wage gap between specified immigrants and “similar” natives (see below) on the natural log of the ratio of aggregate hours worked of immigrants and natives, using variation across metropolitan areas, year (2000 or “2008”), and the two broad education of columns 2 and 3. All regressions control for year by education effects. Standard errors, in parentheses, computed to be robust to arbitrary error correlation within metropolitan area. Sample for constructing mean wages limited to working-age respondents (age sixteen to sixty-five and old enough to be out of school given normal progression), who reside in one of 136 large metropolitan areas and not in group quarters, who are currently employed, and who had positive hours and weeks worked, positive wage and salary earnings, and zero business and farm earnings in the past year; for natives, sample is further limited to those who report speaking English “only” or “very well.” Hourly wages above \$200 and below \$2 in 1999 dollars were reset to these thresholds. The mean ln hourly wage of “similar” natives is computed by weighting natives to have the same distribution across potential experience (in five-year bands) × education (four groups: high school dropouts, high school, some college, and at least four years college) cells as the specified group of immigrants in the metropolitan area and year.

TABLE 3.6 / Immigrant Relative Wages and Language

	ln(Immigrant Wage/Native Wage), High School or Less				
	All	Spanish-Speaking		Other	
ln(immigrant hours/ native-born hours)	-0.034 (0.004)				
ln(poor/strong English- speaking hours)	-0.034 (0.004)	-0.036 (0.007)	-0.033 (0.028)	-0.060 (0.018)	
ln(Spanish-speaking hours/ strong English-speaking hours)					
Among workers with high school education or less			-0.045 (0.035)	0.052 (0.024)	
Among workers with more than high school education			0.065 (0.017)	-0.015 (0.017)	
Metro × year observations	272	272	272	272	272
R <sup>2</sup>	0.300	0.298	0.157	0.224	0.110

*Source:* Author's compilation based on the 2007–2009 American Community Surveys (Ruggles et al. 2010), and the U.S. Bureau of the Census (2003).

*Note:* Wage sample limited to working-age respondents (age sixteen to sixty-five and old enough to be out of school, given normal progression) that have twelve or fewer years of education (or a GED), that reside in one of 136 large metropolitan areas and not in group quarters, that are currently employed, and that had positive hours worked, positive wage and salary earnings, and zero self-employment earnings in the past year; for natives it also requires speaking English only or very well. The dependent variable is the difference in the mean ln hourly wage between the specified group of immigrants and similar natives, where the mean ln hourly wage of “similar” natives is computed by weighting natives to have the same distribution across potential experience (in five-year bands) × education (high school dropouts or completers) cells as the specified group of immigrants in the metropolitan area and year. Strong English-speaking hours worked is the sum of hours worked by those who report speaking English only, very well, or well. Poor English-speaking hours are the sum of hours worked reported by those who speak English not well or not at all among working-age respondents. Spanish-speakers are respondents who report speaking Spanish at home. All regressions are unweighted and control for year effects. Standard errors, in parentheses, computed to be robust to arbitrary error correlation within metropolitan area.

TABLE 3.7 / Aggregate Estimates, 1970–2000

	Puerto Rico			Continental United States			
	Y=ln (foreign/ native weekly wage)	Y = ln (foreign/native weeks)		Excluding 1970	Excluding 1970 Strong English	Excluding 1970 Poor English	
ln(foreign-born weeks/native-born weeks)	0.150 (0.061)			–0.033 (0.017)	–0.021 (0.019)	–0.002 (0.020)	–0.031 (0.049)
ln(continental U.S. born ethnic Puerto Ricans/Puerto Rican-born)		–0.002 (0.126)	1.003 (0.126)				
Observations	224	224	224	180	144	144	144
R <sup>2</sup>	0.489	0.457	0.919	0.935	0.942	0.913	0.976

Source: Author's compilation based on Ruggles et al. (2010).

Note: Sample for independent variable includes workers age sixteen to sixty-five who are old enough to be out of school given normal progression through school and not living in group quarters. The sample used to compute the dependent variable, weekly wages, is this sample with the additional requirement of being currently employed (U.S.) or reporting an occupation (Puerto Rico), not enrolled in school and without business or farm income. In U.S. data (columns 4–7), weekly wages exceeding \$10,000 or below \$10 in 1999 dollars were reset at these thresholds. In columns 5–7, native-born workers who did not report speaking English were excluded from the wage sample. Sample weights used to aggregate variables to the five-year experience × education cells used in the analysis (see text). Standard errors are calculated to be robust to arbitrary error correlation within education × experience cells.

*Source:* Authors' compilation based on U.S. Census Bureau Decennial Census (2003).

*Note:* Continuous, Post-World War II, Emerging, and Re-Emerging gateways have foreign-born populations greater than 200,000 and either foreign-born shares higher than the 2000 national average (11.1 percent) or foreign-born growth rates higher than the national average (57.4 percent), or both. Former gateways are determined through historical trends (see below). Pre-Emerging gateways have smaller foreign-born populations but very high growth rates in the 1990s. The gateway definitions and selection are also based on the historical presence (in percentage terms) of the foreign-born in their central cities:

Former: Above national average in percentage foreign-born 1900–1930, followed by percentages below the national average in every decade through 2000

Continuous: Above-average percentage foreign-born for every decade, 1900–2000

Post-World War II: Low percentage foreign-born until after 1950, followed by percentages higher than the national average for remainder of century

Emerging: Very low percentage foreign-born until 1970, followed by a high proportions in the post-1980 period

Re-emerging: Similar pattern to continuous gateways: Foreign-born percentage exceeds national average 1900–1930, lags it after 1930, then increases rapidly after 1980

Pre-emerging: Very low percentages of foreign-born for the entire twentieth century.

*Source:* Authors' calculations based on the U.S. 1% Census (1980) and the March Current Population Surveys (2006, 2008, 2010).

*Note:* Weighted percentages from the U.S. Bureau of the Census 1% Census (1980) and the March current population surveys (2006, 2008, and 2011). Age adjusted with composite second generation (2006–2010) as standard population. The 1.5 generation is defined as foreign born who immigrated before secondary school (younger than thirteen). The second generation are children born in the United States to at least one foreign-born parent. Where national origins of the mother and father differ, the national origin of the father is used. Poverty is defined as the official poverty status of the individual's household according to the definition of poverty originally developed by the Social Security Administration in 1964, later modified by federal interagency committees in 1969 and 1980. High school completion includes GED. College completion includes a bachelor's degree or higher. Occupational status scores are created from ISCO-88 occupation codes into the International Socio-Economic Index Scores (Ganzeboom and Treiman 1996). Net Difference Score from Feliciano (2005).

FIGURE 11.1 / Household Safety Net Participation Rates, Children by Immigrant Status of Head, Any Safety Net

*Source:* Authors' calculations based on 1995–2010 Current Population Survey and Annual Social and Economic Supplement data.

*Note:* Sample includes children under eighteen and program participation is measured at the household level. Any safety net program participation means someone in the household participated in public assistance, food stamps, Medicaid, free or reduced price school lunch, SSI, public housing or received a rental subsidy from the government, or energy assistance. Shaded areas refer to annual periods of labor market contraction. Native household heads are those who were born in the United States or Puerto Rico or outlying areas or who were born abroad to U.S. parents, immigrant heads are other foreign born. See text for details.

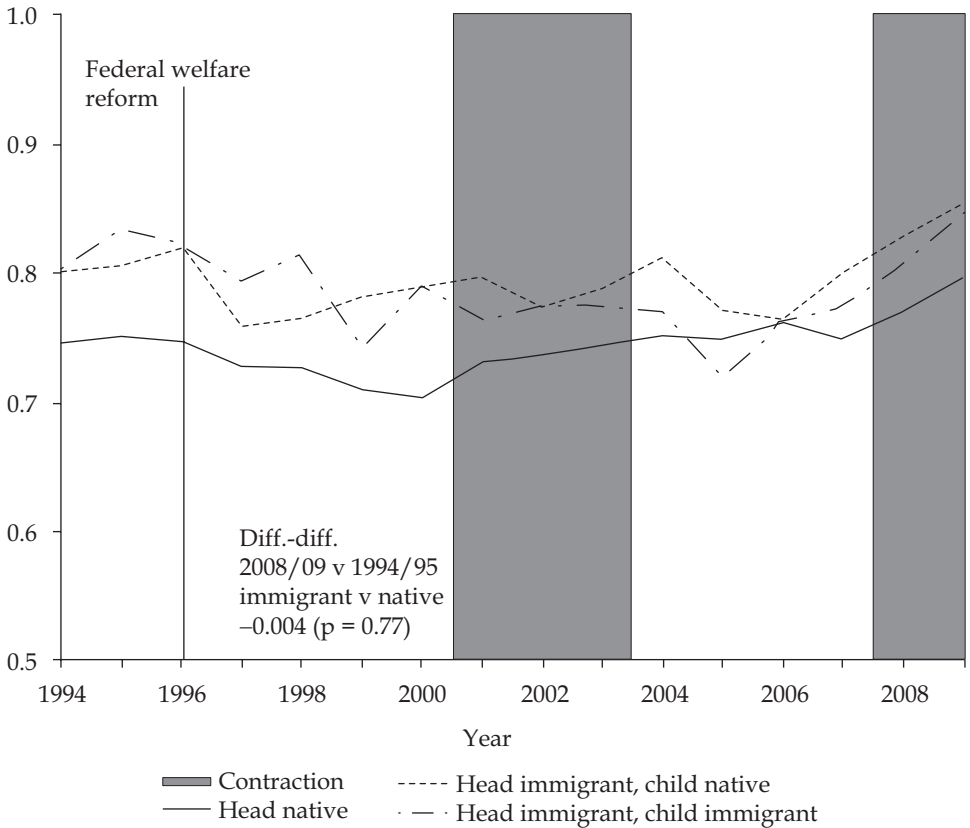

FIGURE 11.2 / Household Safety Net Participation Rates, Children by Immigrant Status of Head, Public Assistance and Food Stamps

Source: Authors' calculations based on 1995–2010 Current Population Survey and Annual Social and Economic Supplement data.

Note: Sample includes children under eighteen and program participation is measured at the household level. Any safety net program participation means someone in the household participated in public assistance, food stamps, Medicaid, free or reduced price school lunch, SSI, public housing or received a rental subsidy from the government, or energy assistance. Shaded areas refer to annual periods of labor market contraction. Native household heads are those who were born in the United States or Puerto Rico or outlying areas or who were born abroad to U.S. parents, immigrant heads are other foreign born. See text for details.

FIGURE 11.3 / Household Safety Net Participation, Rates in Households with Income Less than 200 Percent Poverty, Children by Own and Head's Immigrant Status, Any Safety Net

Source: Authors' calculations based on 1995–2010 Current Population Survey and Annual Social and Economic Supplement data.

Note: Sample includes children under eighteen with household income below 200 percent poverty. Program participation is measured at the household level. Any safety net program participation means someone in the household participated in public assistance, food stamps, Medicaid, free or reduced price school lunch, SSI, public housing or received a rental subsidy from the government, or energy assistance. Shaded areas refer to annual periods of labor market contraction. Native household heads are those who were born in the United States or Puerto Rico or outlying areas or who were born abroad to U.S. parents, immigrant heads are other foreign born. Children's immigration status defined in same way. Figures are weighted. Shaded areas refer to annual periods of labor market contraction. See text for details.

*Source:* Authors' calculations based on 1995 and 2010 Current Population Survey Annual and Social Economic Supplement data.

*Note:* Sample includes households with children in which income is below 100 percent of official poverty, poverty is assigned at the household level. Total income includes the value of food stamps. Native household heads are those who were born in the United States or Puerto Rico or outlying areas or who were born abroad to U.S. parents, immigrant heads are other foreign born. Categories of income do not sum to 1, some income categories are omitted. Figures are weighted.

FIGURE 11.15 / Share of Income, by Source, for Households with Children Below Official Poverty, 1994 and 2009, Immigrant-Headed Households

*Source:* Authors' calculations based on 1995 and 2010 Current Population Survey Annual and Social Economic Supplement data.

*Note:* Sample includes households with children in which income is below 100 percent of official poverty, poverty is assigned at the household level. Total income includes the value of food stamps. Native household heads are those who were born in the United States or Puerto Rico or outlying areas or who were born abroad to U.S. parent(s), immigrant heads are other foreign born. Categories of income do not sum to 1, some income categories are omitted. Figures are weighted.

FIGURE 11.18 / Child Poverty Rates, by Immigrant Status of Child and Head of Household, Below 50 Percent Official Poverty

Source: Authors' calculations based on 1995–2010 Current Population Survey Annual and Social Economic Supplement data.

Note: Sample includes children and poverty is assigned at the household level. Official poverty uses total household income and household size and the official census poverty thresholds; alternative poverty uses total cash income plus the EITC and child tax credits and other transfers minus FICA and state and local taxes. Native household heads are those who were born in the United States or Puerto Rico or outlying areas or who were born abroad to U.S. parents, immigrant heads are other foreign born. Children's immigration status assigned analogously. Figures are weighted. Shaded areas refer to annual periods of labor market contraction. See text for details.

FIGURE 11.19 / Child Poverty Rates, by Immigrant Status of Child and Head of Household, Below 100 Percent Official Poverty

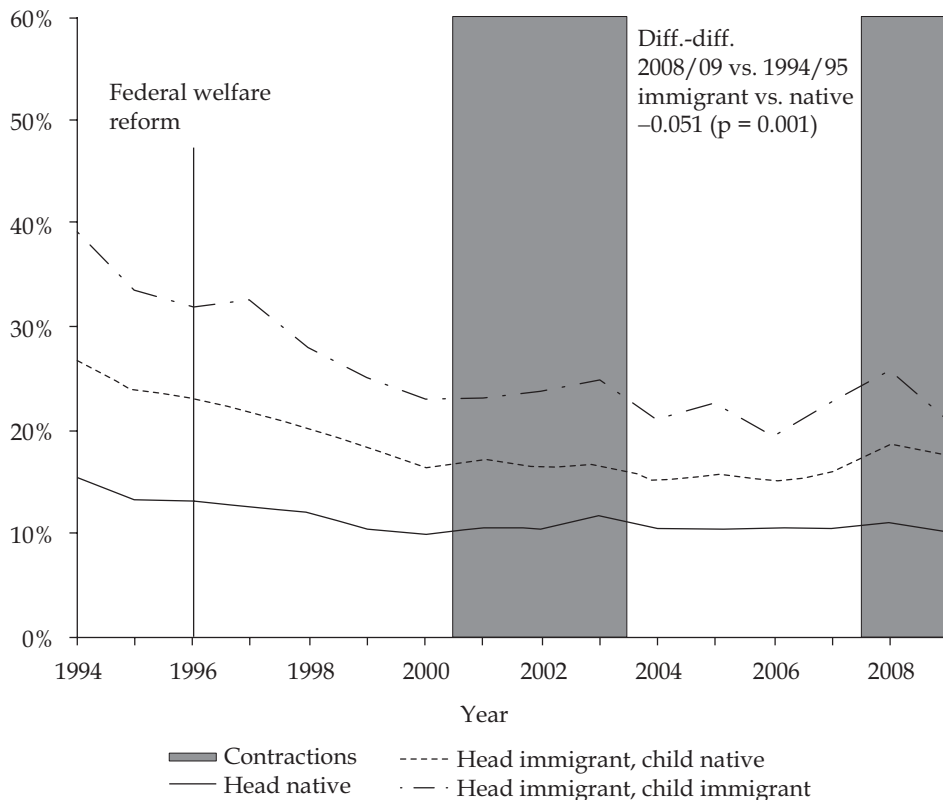

Source: Authors' calculations based on 1995–2010 Current Population Survey Annual and Social Economic Supplement data.

Note: Sample includes children and poverty is assigned at the household level. Official poverty uses total household income and household size and the official census poverty thresholds; alternative poverty uses total cash income plus the EITC and child tax credits and other transfers minus FICA and state and local taxes. Native household heads are those who were born in the United States or Puerto Rico or outlying areas or who were born abroad to U.S. parents, immigrant heads are other foreign born. Children's immigration status assigned analogously. Figures are weighted. Shaded areas refer to annual periods of labor market contraction. See text for details.

FIGURE 11.20 / Child Poverty Rates, by Immigrant Status of Child and Head of Household, Below 100 Percent Alternative Poverty

Source: Authors' calculations based on 1995–2010 Current Population Survey Annual and Social Economic Supplement data.

Note: Sample includes children and poverty is assigned at the household level. Official poverty uses total household income and household size and the official census poverty thresholds; alternative poverty uses total cash income plus the EITC and child tax credits and other transfers minus FICA and state and local taxes. Native household heads are those who were born in the United States or Puerto Rico or outlying areas or who were born abroad to U.S. parents, immigrant heads are other foreign born. Children's immigration status assigned analogously. Figures are weighted. Shaded areas refer to annual periods of labor market contraction. See text for details.

TABLE 11.1 / Expenditures and Participation in Cash or Near-Cash Safety Net Programs

	Number of Recipients (thousands)	Total Benefit Payments (millions of 2009\$)	Average Monthly Benefit (2009\$)	Estimated Number of Children Removed from Poverty (millions, in 2011)
Cash or near cash means tested programs				
Temporary Assistance for Needy Families	1,796	\$9,324	\$397	0.4
Food Stamp Program	15,232	\$50,360	\$276	2.1
Federal Earned Income Tax Credit	24,757	\$50,669	\$171	4.7
Supplemental Security Income, non-Disabled	6,407	\$41,023	\$517	0.6
Noncash means tested programs				
Medicaid, Children (2007)	27,527	\$53,716	n/a	n/a
Medicaid, All (2007)	56,821	\$276,246	n/a	n/a
National School Lunch Program, Free and Reduced Price (2009)	19,446	\$7,563	n/a	0.7
School Breakfast Program, Free and Reduced Price (2009)	9,068	\$2,498	n/a	n/a
Other short-term income replacement programs				
Unemployment Compensation, Total	5,757	\$131,420	n/a	1.0

*Source:* Authors' compilation based on the following: For TANF, Food Stamps, the child nutrition programs, and Unemployment Compensation program data sources, see the appendix; EITC data are from the Tax Policy Center (2010); SSI data are from Social Security Administration (2010); poverty data are from Short (2012).

*Note:* Data for all programs refer to calendar year 2009 and are in 2009 dollars except the EITC, which refers to 2008 (and amounts are in 2008 dollars), TANF and the child nutrition programs (National School Lunch Program and School Breakfast Program), which are for fiscal year 2009 (year ending September 30, 2009), and Medicaid which refers to 2007 (and amounts are in 2007 dollars). SSI includes federal and state supplement payments and participation and the EITC includes the total tax cost (not just refundable portion).

TABLE 11.3 / Characteristics of Households with Children, by Immigrant Status of Head of Household

	All Households		Households < 200% Poverty	
	Natives	Immigrants	Natives	Immigrants
Characteristics of household head (at survey)				
Mean age	40.1	40.5	37.5	39.2
Male	0.467	0.524	0.327	0.470
White, non-Hispanic	0.715	0.140	0.550	0.082
Black, non-Hispanic	0.156	0.092	0.268	0.095
Hispanic	0.098	0.544	0.149	0.696
Less than high school	0.089	0.319	0.199	0.476
High school	0.285	0.241	0.389	0.281
More than high school	0.625	0.440	0.412	0.242
Never married	0.154	0.111	0.303	0.159
Married	0.661	0.758	0.410	0.687
Female unmarried family	0.226	0.153	0.435	0.216
Employed	0.725	0.716	0.522	0.611
Not in labor force	0.192	0.201	0.338	0.277
Any health insurance	0.847	0.648	0.691	0.479
Characteristics of the household				
Number of children	1.8	2.0	2.1	2.2
Any elderly	0.05	0.07	0.05	0.06
Number of persons	3.9	4.4	4.0	4.5
Own home	0.679	0.515	0.403	0.336
Household earnings	\$74,210	\$61,938	\$17,894	\$22,913
Household income	\$81,615	\$66,423	\$23,639	\$25,854
Less than 50% FPL	0.058	0.081	0.180	0.161
Less than 100% FPL	0.139	0.222	0.433	0.440
Less than 150% FPL	0.230	0.376	0.715	0.746
Greater than 200% FPL	0.678	0.496	0.000	0.000
Any foreign born	0.058	1.000	0.055	1.000
Any adult born citizen	1.000	0.248	1.000	0.193
Any child born citizen	0.996	0.877	0.998	0.873
Any child foreign born	0.008	0.226	0.004	0.263

Source: Authors' calculations based on 2010 CPS Annual Social and Economic Supplement data for households with at least one child.

Note: Demographics and living arrangements refer to the time of the survey (February, March, or April 2010) and income and program receipt refer to calendar year 2009. Statistics are weighted.

TABLE 11.4 / Household Safety Net Participation Rates, for Immigrant-Headed Households with Children with Income Less than 200 Percent of Poverty

		N	Any Safety Net	Public Assistance	Food Stamps	Medicaid- SCHIP	School Lunch	SSI
Pre-reform (1994–1995)								
Arrived six+ years ago, pre-enactment	(1)	6294	0.811	0.221	0.353	0.474	0.680	0.058
Arrived ≤ five years ago, pre-enactment	(2)	1648	0.792	0.287	0.394	0.553	0.569	0.049
Post-reform (2008–2009)								
Arrived six+ years ago, pre-enactment	(3)	6898	0.837	0.076	0.301	0.672	0.634	0.048
Arrived six+ years ago, post-enactment	(4)	3669	0.843	0.072	0.316	0.676	0.601	0.022
Arrived ≤ five years ago, post-enactment	(5)	1875	0.836	0.073	0.330	0.645	0.532	0.018
Post-reform–Pre-reform								
Arrived six+ years ago	(4)–(1)		0.032	–0.149	–0.037	0.202	–0.079	–0.036
Arrived ≤ five years ago	(5)–(2)		0.044	–0.214	–0.064	0.092	–0.036	–0.031

*Source:* Authors' calculations based on 1995, 1995, and 2010 CPS Annual Social and Economic Supplement data.

*Note:* Sample includes households with children under eighteen with heads born not a U.S. citizen and living in households with income under 200 percent of poverty and program participation is measured at the household level. Any safety net program participation means someone in the household participated in public assistance (AFDC-TANF or GA), food stamps, Medicaid-SCHIP, free or reduced price school lunch, SSI, public housing or received a rental subsidy from the government, or energy assistance. Arrival cohort is assigned using when the household head came to the United States to stay. See text for details about coding of time of arrival.

TABLE 11.5 / Poverty Rates for Immigrant-Headed Households with Children

		N	Below 50% Poverty	Below 100% Poverty	Below 50% Alternative Poverty	Below 100% Alternative Poverty
Pre-reform (1994–1995)						
Arrived six+ years ago, pre-enactment	(1)	10245	0.103	0.296	0.044	0.256
Arrived ≤ five years ago, pre-enactment	(2)	2301	0.187	0.425	0.124	0.372
Post-reform (2008–2009)						
Arrived six+ years ago, pre-enactment	(3)	13377	0.082	0.229	0.045	0.155
Arrived six+ years ago, post-enactment	(4)	5979	0.109	0.319	0.057	0.218
Arrived ≤ five years ago, post-enactment	(5)	2982	0.153	0.359	0.079	0.277
Post-reform–Pre-reform						
Arrived six+ years ago	(4)–(1)		0.006	0.023	0.013	–0.038
Arrived ≤ five years ago	(5)–(2)		–0.034	–0.066	–0.045	–0.095

*Source:* Authors' calculations based on 1995, 1995, and 2010 CPS Annual Social and Economic Supplement data.

*Note:* Sample includes households with children under eighteen with heads born not a U.S. citizen and program participation is measured at the household level. Extreme poverty and official poverty calculated using official CPS poverty thresholds and income sources and household size; alternative poverty calculated using official CPS poverty thresholds and household size, and using household income measured as CPS cash income minus FICA and state and local taxes plus the EITC and relevant child tax credits plus cash transfers. Arrival cohort is assigned using when the household head came to the United States to stay. See text for details about coding of time of arrival.

TABLE 11.6 / Impact of State Unemployment Rates on State Child Poverty Rates, 2007–2009

	Below 100% Poverty	Below 100% Alternative Poverty	Below 50% Poverty	Below 50% Alternative Poverty
Sample: All children				
Native head	0.82** (0.31)	0.59** (0.29)	0.04 (0.22)	0.17 (0.17)
Non-native head	0.92 (0.83)	1.50** (0.63)	0.82* (0.47)	0.76 (0.46)
Sample: All children with non-native heads				
Non-Mexican head	0.34 (1.03)	0.17 (0.80)	0.31 (0.60)	0.16 (0.47)
Mexican head	0.89 (1.22)	2.69** (1.11)	1.38 (0.83)	1.32* (0.76)
Sample: All children with non-native heads				
Naturalized head	-0.42 (1.15)	0.74 (0.96)	0.36 (0.74)	0.15 (0.66)
Noncitizen head	2.54** (1.06)	2.46** (0.94)	1.43** (0.68)	1.28** (0.57)
Sample: All children with noncitizen heads				
Non-Hispanic head	0.79 (1.76)	-0.80 (1.37)	1.59 (1.15)	1.56 (1.01)
Hispanic head	2.44** (1.05)	3.18*** (1.14)	1.29 (0.84)	1.14 (0.76)

Source: Authors' calculations.

Note: Each cell in the table presents the estimate of a regression of change in state child poverty rates on change in state unemployment rate for 2007–2009. Estimates are weighted using the population in the cell. Sample includes children and poverty is assigned at the household level. Official poverty uses total household income and household size and the official Census poverty thresholds; alternative poverty uses total cash income plus the EITC and child tax credits and other transfers minus FICA and state and local taxes. Native household heads are those who were born in the United States or Puerto Rico or outlying areas or who were born abroad to U.S. parent(s), immigrant heads are other foreign born. See text for details.

*Source:* Authors' compilation based on Welfare Rules Database (<http://anfdata.urban.org/wrd/WRDWelcome.cfm>) cross-checked with Wendy Zimmerman and Karen Tumlin (1999) and the National Immigration Law Center (2002) and (2004).

*Note:* An "X" indicates that the state covers Legal Permanent Residents (LPRs) in that year without any caveats and the state has implemented TANF. Prior to TANF implementation, AFDC rules dictate eligibility. Certain subgroups of immigrants may be covered in unmarked states (see source data for details). State policies electing whether to bar immigrants (first two columns) rarely changed over time; "X" indicates covered as of TANF implementation. Exceptions include Idaho and North Dakota (both began coverage for post-enactment, post-five-year bar group in 2004) and Montana (coverage for pre-enactment group discontinued in 2002; coverage for post-enactment, post-five-year bar discontinued in 2002 and reinstated in 2009). The coverage indicator is consistent across sources except for the following cases: for pre-enactment immigrants: Alabama in 1998; Mississippi in 1998, 2002, and 2004; and Montana in 2002 and 2004. For post-enactment post, five-year bar: Alabama, Florida, Idaho, Louisiana, Ohio, and Utah in 1998; Arkansas, Montana, and South Carolina in 2002 and 2003; North Dakota in 2004. For post-enactment, during five-year bar: Hawaii, New Mexico, and New York in 1998 and Georgia in 2004. In these cases the cross checked sources indicate opposite coverage of what is listed.

<sup>a</sup>Immigrants only eligible after they have resided in this state for six months.

*Source:* Authors' compilation based on Wendy Zimmerman, Karen Tumlin, and Jason Ost (1999) for 1998 and National Immigration Law Center for 2002, 2005, 2006, 2007, and 2008.

*Note:* An "X" indicates that the state covers Legal Permanent Residents (LPRs) in that year (see footnotes for major exceptions). Certain subgroups of immigrants may be covered in unmarked states (see source data for details). In 1998 a blank for post-enactment, post-five-year bar can mean the state has not implemented this policy yet.

<sup>a</sup>Only to LPRs with forty quarters of work and the veteran and "refugee" categories.

<sup>b</sup>Available for children.

<sup>c</sup>Available for pregnant women.

<sup>d</sup>Only available to children, pregnant women, or disabled immigrants.

<sup>e</sup>Seniors and disabled eligible up to 100 percent FPL; children up to 200 percent FPL. All children are eligible for preventative care.

<sup>f</sup>Children and parents are eligible. Beginning in 2007, limited funds for prenatal care are available for up to 200 percent of the federal poverty line.

<sup>g</sup>Must be a resident for six months (Pennsylvania) or one year (Washington) before eligibility begins.

<sup>h</sup>Seniors and disabled immigrants receiving cash assistance are eligible. Prenatal care is available. Children are covered up to 100 percent of the FPL, however total allowances are capped.

*Source:* Authors' compilation based on Wendy Zimmerman and Karen Tumlin (1999) for 1998, and the National Immigration Law Center for 2002, 2005, and 2006.

*Note:* An "X" indicates that the state covers Legal Permanent Residents (LPRs) in that year (see footnotes for major exceptions). Following the Balanced Budget Act of 1997, all immigrants receiving SSI prior to 1996 as well as those who entered before 1996 and would become eligible, were eligible for SSI.

<sup>a</sup>Illinois is recorded immigrants was also covering pre-enactment immigrants who are sixty-five or older, and are determined ineligible because they do not have a disability in 2002, 2005, and 2006 and covering refugees past their seven-year quota in 2005 and 2006.

<sup>b</sup>Funds only available after the individual exceeds the five-year bar.

*Source:* Authors' compilation based on Wendy Zimmerman and Karen Tumlin (1999) for 1998, Schwartz (2001) for 2001, National Immigrant Law Center for 2002, and the USDA's "Food Stamp Program State Options Report" for 2003–2009.

*Note:* An "X" indicates that the state covers legal permanent residents (LPRs) in that year (see footnotes for major exceptions). In 1998 the Agriculture Research, Extension, and Education Reform Act restored eligibility for pre-enactment immigrants receiving payments or assistance for blindness or disability, those who were sixty-five or older on August 22, 1996, and pre-enactment minors. The 2002 Farm Bill gave eligibility for Post-Enactment immigrants who have lived in the United States for five years, and for all immigrant children and disabled individuals. Effective October 1, 2002, "qualified" immigrants receiving disability-related assistance will be eligible. Effective April 1, 2003, "qualified" immigrants who have lived in the United States for five or more years as a "qualified" immigrant will be eligible. Effective October 1, 2003, "qualified" immigrant children will be eligible, regardless of their date of entry.

<sup>a</sup>Qualified immigrants in Massachusetts in 2002 and immigrants entering after April 1, 1998, in Connecticut in 2002 must meet a six-month residency requirement.

<sup>b</sup>Only children, elderly, and disabled are covered.

<sup>c</sup>Only available to those age sixty to sixty-four (without a disability) or parents residing with children who are eligible for federal food stamps.

<sup>d</sup>Only available to children younger than eighteen.

<sup>e</sup>Only available to former food stamp recipients.

<sup>f</sup>Only eligible if the immigrant is sixty-five or older; a legal guardian living with dependent children under eighteen; mentally or physically incapacitated; receiving GA benefits and considered unemployable. Must apply for citizenship within sixty days of being certified for food stamps.

<sup>g</sup>Only eligible between the ages of sixty and sixty-eight. Must live in the same county as on August 22, 1996.

<sup>h</sup>Only eligible if between sixty-five and sixty-eight, are eligible for SSI, have been in the United States for five years, and are Ohio residents as of August 22, 1996.

<sup>i</sup>Must be residents of Rhode Island before August 22, 1996.

<sup>j</sup>Only eligible if turned sixty-five after August 22, 1996, but before March 1, 1998, and have received food stamps anytime from September 1996 to August 1997.

FIGURE 12.1 / Recipients of Income Maintenance Programs

Source: Adapted from Scholz, Moffit, and Cowan (2008) (see also the note below).

Note: Figures in thousands. Most of the data for the period from 1970–2005 are adapted from Scholz et al. (2008). Where possible, we extended the figure backward and forward with data from the USDA; the 1969, 1972, and 2011 U.S. Statistical Abstract; and the Tax Policy Center. In some instances, there are slight discrepancies in measurement between Scholz et al. and the data points we added. Where the discrepancies were large, we did not extend the graph. Prior to 1972, SSI data included recipients of Old Age Assistance, Aid to the Blind, and Aid to the Permanently and Totally Disabled.

N	527	860	4,551	5,136	4,100

Source: Authors' compilation based on pooled Public Policy Institute of California Statewide Surveys, January and May, 2010–2012 (Public Policy Institute of California 2013).

<sup>a</sup>The survey question was "What if the state said it needed more money just to maintain current funding for health and human services? Would you be willing to pay higher taxes for this purpose, or not?" The question in May 2012 differed slightly, asking, "Would you be willing to pay higher taxes for health and human services, or not?" All questions were preceded by the statement, "Tax increases could be used to help reduce the state budget deficit."

<sup>b</sup>The survey question was "Spending cuts could be used to help reduce the state budget deficit. . . . How about cutting spending on health and human services? Do you support or oppose this proposal?"

<sup>c</sup>Percentages are calculated using survey weights and do not always equal 100 due to rounding. The number of survey respondents reported is the unweighted sample.

Note: The values are the estimated coefficients of separate regressions by country of a dummy for having a job on dummies for EU and non-EU immigrants. Separate regressions are run for each country. The sample are individuals in working-age population not in military service and not in education or training. We define an individual as in employment if he or she is employed or self-employed. Year and quarter effects: year-quarter interaction dummies. Gender: dummy for female. Age: dummies for five-year age groups. Education: dummies for lower secondary, secondary, and tertiary education.

Note: Table reports the differences (as fractions of a country-specific standard deviation) in Socio-Economic Index (SEI) of immigrant workers relative to native workers. The values are the estimated coefficients of separate regressions by country of the ISEI index (normalized by its standard deviation) on dummies for EU and non-EU immigrants and year-quarter interaction dummies (columns 1–2), and other control variables (columns 3–6). Year and quarter effects: year-quarter interaction dummies. Gender: dummy for female. Region: regional dummies. Age: dummies for five-year age groups. Education: dummies for lower secondary, secondary, and tertiary education. 1-digit occupation: dummies for 1-digit ISCO codes.

Source: Authors' compilation based on EULFS (2007–2009).

Note: All numbers are percentages. Children are those under fifteen. EU (non-EU) households are defined as households where the reference person and her or his spouse, if there is a spouse, is an EU (Non-EU) immigrant. Mixed households are households where the reference person and her or his partner have a different immigrant status. We define immigrants as *foreign born* in all countries except for Germany, where they are defined as *foreign nationals*.
