

# INDEX

- Anderson, Cameron, 33, 40–41, 45, 50–51, 57–58  
associational preference bias, 122, 130–31
- backlash to perceived challenges to status, 52–53, 118
- Bai, Feng, 173*n*37
- Bales, Robert Freed, 7–9, 11, 13, 165*n*9
- behavioral styles: emergence of status and, 102–3; as status cue, 104, 113–15
- Bendersky, Corrine, 60, 116
- Berger, Joseph, 86
- Bianchi, Alison, 76
- bias: associational preference, 122, 130–31; evoked by status beliefs, inequality and, 121–23, 158–60; legitimacy, 121–22, 130, 147, 159; status, 121, 130, 158
- Blader, Steven, 60
- Blumer, Herbert, 52, 145
- Bobo, Lawrence, 52–53, 145
- Boehm, Christopher, 32
- Bourdieu, Pierre, 140
- Boyd, Robert, 166–67*n*9
- Brando, Marlon, 5
- Brashears, Matthew, 86
- Brewer, Marilyn, 166*n*9, 168*n*38
- Bridges, William, 133
- Caporael, Linnda, 166*n*9, 168*n*38  
caring about status, 47–48, 54; closely monitoring one's own and others' status, 50–51; framing considerations, 48–49; as a fundamental human motive, 50; low-status individuals and (*see* low-status individuals); persistent motivator, strength of status as, 58–61; threats to status, strong reactions to, 51–53. *See also* incentives to pursue status
- Chase, Ivan, 28
- Cheng, Joey, 22, 25
- Cheryan, Sapna, 138
- class, social. *See* social class
- Clinton, Hillary, 24
- Cohen, Geoffrey, 111
- collective goal attainment: collective pressure by third parties and, 29–30; status hierarchies and, 13–14
- Conway, Michael, 113
- cooperative-competitive tension. *See* interdependence
- Correll, Shelley, 111
- Craig, Maureen, 53
- Cramer, Katherine, 53, 59
- cultural beliefs: status as based on, 4, 11, 15–16, 152–53

- cultural “common knowledge”: normative dimension of status and, 35–37; status beliefs as, 70, 74–76 (*see also* status beliefs)
- cultural schema theory, 3, 68, 151–52, 158; basic status norm, 37–38, 44–45, 54–56, 65–66, 153; conditional range of, 92–93; the desire for status and the stability of status hierarchies explained by, 155–56; evolutionary roots of status and (*see* evolutionary roots of status/hierarchy); interpersonal status hierarchies and, 7 (*see also* interpersonal status hierarchies); limits to, 157–58; microdynamics of (*see* microdynamics of status processes); the range of status rankings explained by, 156–57; the second-order nature of the governing status consensus explained by, 154–55; status as a cultural schema, 3–4, 20–22, 152–54; status beliefs (*see* status beliefs); status characteristics and expectation states theory and, 9; as twofold, 3–6, 20–21, 37–39, 46, 68, 151. *See also* status
- Diekema, David, 31–35
- diffuse status characteristics, 77
- dominance, 21–28; collective restraints on, 30–32, 35; normative status systems and, 42–43; task competence and, 33
- double standards, 111–12
- Dovidio, John, 109, 114
- Eagly, Alice, 87–88
- Emerson, Richard, 32
- evolutionary roots of status/hierarchy, 4, 14; dominance relations, 21–28; prestige, 21–22, 25–28
- expectation states theory. *See* status characteristics and expectations states theory
- Fisek, Hamit, 86
- Fiske, Susan, 49, 54, 75, 78–79, 171*n*72
- formation of status beliefs, 82; construction of gender as an example of, 86–89; essential elements for, 89–90; organizational research on, 90–91; status construction theory, 82–86
- Galinsky, Adam, 102, 107, 114
- gateway institutions, 135
- gender: belief in the essentialization of, 137–39; construction of as status difference, 86–89, 128; cross-category interactions, differentiation of material outcomes based on, 134; in jury proceedings, 80; status beliefs embedded in organizational structures and practices, 132–33; status beliefs regarding, modest changes in, 143; status-biased expectations and, 81; status hierarchy based on, reactions to challenges to, 52; stereotypes about shared by men and women, 72; the trade-off between status and warmth and, 171*n*72
- Giddens, Anthony, 3
- Gidrom, Noam, 146
- Gil-White, Francisco, 25, 167*n*23
- Glick, Peter, 171*n*72
- goal-related competence, 27, 31–33, 98–99, 151
- Goffman, Erving, 11, 74
- governing status consensus: nature of, 39–42; second-order nature of, 154–55
- Greer, Lindred, 59
- Griskevicius, Vladus, 62
- groups, status rankings of: benefits and costs of, 161; consolidation of, 127–29; contextual factors in, 98–99; distinguishing characteristics of, 10–12; goal-related competence and, 27, 33, 98–99; group-oriented motivation and, 26–27, 98–99; interpersonal hierarchies and, 7 (*see also* interpersonal status hierarchies); leaders and followers, tensions between, 44–45; performance capacity and, 26; a sense of group

- position and, 145–47; status beliefs and, 68–69, 127–29 (*see also* status beliefs); systems of inequality and, 6. *See also* gender; race; social class
- Hahl, Oliver, 44, 79, 174*n*81
- Hall, Peter, 146
- Hamilton, David, 85
- Hays, Nicholas, 59–60
- Heinrich, Joseph, 25, 167*n*23
- hierarchies: dominance, 22–28, 43–44; human compared to animal, 23; interpersonal deference (*see* interpersonal deference hierarchies); prestige, 25–28; status (*see* status hierarchies)
- Hildreth, John, 50
- Hochschild, Arlie, 53, 59, 146, 165*m*1
- Horne, Christine, 30
- Howland, Laura, 50
- Huber, Joan, 88
- Huo, Yuen, 58
- Hysom, Stuart, 112
- incentives to pursue status, 54; direct, 55–56; indirect, 56–58
- inequality: the double-edged sword of status and, 161–62; legitimation of (*see* legitimation of inequality); material structure of, definition of, 125; paradox of status and, 149; power and wealth as basis for, status distinguished from, 14–16; reproduction of difference-based (*see* reproduction of difference-based inequality); stability of the material structure of, 126–27; status and, 2, 158–60; status and, inevitability of, 162–63; status as legitimator of, 5, 125; status beliefs and, 73, 80–81, 96, 124, 141–49, 158–60; status processes and the basic structure of, 124–25
- interdependence: as a necessary condition to invoke the status schema, 92–93; problems of the cooperative/competitive social dynamic of, 12–13; solutions for problems of the cooperative/competitive social dynamic of, 13–14; status and the ubiquity of the cooperative/competitive social dynamic of, 3–4, 20; status characteristics and expectations states theory and, 9
- interpersonal deference hierarchies: collective constraints on dominance, 30–32; collective pressure, third parties and, 29–30; enforcement of status-for-perceived performance capacity, 32–35; social dynamics and, 29
- interpersonal status hierarchies: behavioral indicators of, 7–10; benefits and costs of, 160–61; distinguishing characteristics of, 10–12; dominance as basis of, 22–28; experience of, 6–7; of groups of three or more, 28–29; individual differences assumption, 28; inequality, linkage by status beliefs to, 73, 80–81; microdynamics of (*see* microdynamics of status processes); mutability of, 60; performance expectations and, 9; prestige as basis of, 25–28; in social relational contexts, 48; stability of, 64–67
- Jackman, Mary, 143–44
- Kilduff, Gavin, 33, 102, 107, 114
- Korver-Glenn, Elizabeth, 131
- Kraus, Michael, 58
- legitimacy, 116–20
- legitimacy bias, 121–22, 130, 147, 159
- legitimation of inequality: denial of status and, 148–49; social difference, based on, 143–45
- low-status individuals: incentivizing acceptance of, 61–64, 179*n*82; negative emotions of, 57; payoffs for, 55, 147; questions regarding, 49

- Major, Brenda, 149
- Mazur, Allan, 22–23
- microdynamics of status processes, 97;  
 contexts of, 97–99; emergence and  
 stabilization of status hierarchies,  
 100–103; high status, jockeying for, 106;  
 legitimacy, authority, and backlash,  
 116–19; shared orders of performance  
 expectations, formation of, 103–4; status  
 characteristics as determinant of, 107  
 (*see also* status characteristics); status cues  
 and (*see* status cues); theories applicable  
 to, 99–100
- Mutz, Diana, 53, 59
- Nakagawa, Sandra, 62
- Nelson, Robert, 133
- normative dimension of status, 3–4, 10–11,  
 16; basic status norm, 37–38, 44–45,  
 54–56, 65–66, 153; dominance,  
 management of, 42–43; social control  
 system and, 32; status-for-performance  
 capacity and, 34–35, 44
- performance capacity, 26–27, 29–34
- performance evaluations as status cue, 104,  
 115–16
- performance expectations: advantage/  
 disadvantage, 110–11; changing, 119–20;  
 self-other, 101, 110; shared orders for,  
 formation of, 103–4; status cues and,  
 104–5
- power, 14–16, 59–60
- power-dependence, theory of, 15
- prestige, 21–22, 25–28
- race: belief in the essentialization of,  
 137–40; construction of as status  
 difference, 128; cross-category  
 interactions, differentiation of material  
 outcomes based on, 135; racial bias in  
 real estate transactions, 131; status beliefs  
 embedded in organizational structures  
 and practices, 132; status hierarchy based  
 on, reactions to challenges to, 52; status  
 threats, whites' reactions to, 145–46
- reproduction of difference-based  
 inequality: critical sites for, 133–35;  
 interactional reproduction through  
 organizational practices and procedures,  
 131–33; status characteristics and  
 interactional reproduction, 130–31; status  
 processes and the durability of material  
 inequality, 129
- Richerson, Peter, 166–67/119
- Richeson, Jennifer, 53
- Rudman, Laurie, 52
- Sauder, Michael, 90
- Setiz, Kristine, 28
- Sewell, William, 3, 91
- Shah, Neha, 116
- Sherman, Jennifer, 170/22
- Shih, Margaret, 110
- Smith, Heather, 58
- social class: belief in the essentialization  
 of, 140; construction of as status  
 difference, 128; cross-category  
 interactions, differentiation of material  
 outcomes based on, 134–35; status  
 beliefs embedded in organizational  
 structures and practices, 132
- social rewards as status cue, 104, 112–13
- specific status characteristics, 77–78
- status: benefits and costs of, 160–62;  
 caring about (*see* caring about status);  
 conditional range of, 92–93; cultural  
 schema theory of (*see* cultural schema  
 theory); definitions of, 1, 10–11,  
 150; desire for, 155–56; distinctive  
 characteristics of, 2; incentives to  
 pursue (*see* incentives to pursue  
 status); individual merit and, paradox  
 of, 148–49; microdynamics of (*see*  
 microdynamics of status processes);  
 power and wealth as basis for inequality,  
 distinguished from, 14–16; processes of  
 (*see* status processes); questions about,

- 2, 47; ubiquity of, 1–3, 91–92; ubiquity of, reasons for, 4–5
- status advantage, 93–96; consolidation of through status beliefs, 127–29; created by status beliefs, 72–73, 92; status characteristics, created by, 107–12
- status beliefs, 68–71; biases set in motion by, 121–23, 158–60; changing, potential for, 162–63; competence content of, 77–78; consolidating status advantage through, 127–29; content of, 76–80; coordination and, 73–76; corporate actors, applied to, 69–70; as cultural “common knowledge,” 70, 74–76; definition of, 69; development of (*see* formation of status beliefs); distinctive nature of, 71–73; group position, a sense of, 145–47; inequality and, 73, 80–81, 96, 124, 141–49, 158–60; legitimacy and, 117; legitimization of inequality and, 143–45, 148; material inequality and the maintenance of, 141–43; organizational structures and practices, embedded in, 132–33; shared cultural, 38, 46, 51, 54, 56; stability of interpersonal status hierarchies and, 66–67; status advantage and, 93–96; status characteristics and, 107–8; status-worthiness content of, 78–80; as third-order beliefs, 71–72, 75–76, 84–85; the variable construction of difference and, 136
- status bias, 121, 130, 158
- status characteristics: biases resulting from, 121–23, 130–31; cross-category interactions and, 134–35; diffuse, 77–78, 86, 98, 104, 107–11, 117–20; double standards triggered by, 111–12; interactional reproduction and, 130–31; specific, 77–78, 104, 108, 120; as status cue, 106–12
- status characteristics and expectations states theory, 9, 21, 32; competence content of status beliefs and, 77–78; first- and second-order expectations, disagreement between, 40; microdynamics of status hierarchies and (*see* microdynamics of status processes); performance expectations, conceptualization of, 168/130; scope conditions of, 165/114; second-order expectations, 39; status advantage, 95; status cues and (*see* status cues)
- status consensus, governing. *See* governing status consensus
- status construction theory: construction of gender as example of, 86–89; essential elements for the formation of status beliefs and, 89–90; status beliefs, as theory of development of, 82–86
- status cues: behavioral styles as, 113–15; initial performance expectations shaped by, 103–4; objects as, 113; performance evaluations as, 115–16; salience, weighting, and combining of, 104–5; social rewards as, 112–13; status characteristics as, 106–12
- status generalization: overcoming, 119–20; process of, 80, 107
- status hierarchies: advantages of, 13–14; as “boundedly functional,” 14; consensual aspect of, 12, 40–42; cooperative-competitive tension, as solution for, 13–14; coordination in, norms and, 35–37; distinguishing characteristics of, 10–12; dominance hierarchies, comparison to, 22–25 (*see also* dominance); evolutionary roots of (*see* evolutionary roots of status/hierarchy); exchanges of status for perceived value to the group, based on, 27; as a human invention, 3 (*see also* cultural schema theory); interpersonal (*see* interpersonal status hierarchies); legitimacy of, 116–18; stability of, 64–67, 106, 156
- status interactions, well-being and, 56–58
- status processes: among organizations, 125; conditions triggering, 92–93; as context-dependent, 97–100; as driving

- inequality based on group differences, 5, 18, 127; inequality, interlinked effects consequential for, 124–25; inequality consolidated based on group difference, 127–29; reproduction of difference-based inequality and (*see* reproduction of difference-based inequality); twofold cultural schema and, 46 (*see also* cultural schema theory); the variable construction of difference in, 136–41
- status rankings: in competitive situations, 174n81; of groups (*see* groups, status rankings of); interpersonal status hierarchies and, 7, 48; of objects, 10; of organizations, 90–91, 93; range of, 152, 156–57; second-order consensus about, 40, 154; as a social phenomenon, 11–12
- status threat, perceived, 51–53, 145–47
- status-worthiness, 78–80
- stereotypes, 75–76, 136
- third-order inference, 95–96
- Thye, Shane, 113
- Tiedens, Larrisa, 57
- Tilly, Charles, 18, 125–27
- Troyer, Lisa, 40
- Trump, Donald, 24, 53
- Turco, Catherine, 139
- Tyler, Tom, 58
- Uhlmann, Eric, 111
- U.S. News & World Report*, 91
- Vance, J. D., 170n22
- Van Vugt, Mark, 43
- Veblen, Thorstein, 113
- Walker, Scott, 53
- wealth, 14–16
- Weber, Max, 14, 59, 82, 84, 125
- Wetts, Rachel, 53, 146
- Willer, Robb, 41, 53, 146
- Williams, Joan, 146
- Wood, Wendy, 87–88
- Younts, Wesley, 40
- Zou, Linda, 138
- Zuckerman, Ezra, 44, 79, 174n81
